

Memory Matching Game

with sight words and phonemes

at words are common words that don't always follow phonetic rules. Learning these improves children's reading speed, fluency, and comprehension.

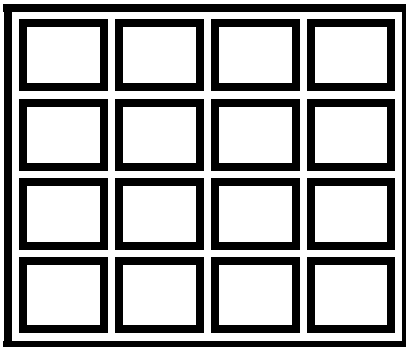

Phonemes are the smallest unit of sound in a word that makes a difference in its pronunciation or meaning, from another word.

Instructions:

Print and cut out **2 copies** of this document.

Place the cards up in a grid (you can choose to play with as few as 4 pairs and up to 16 pairs).

Example:

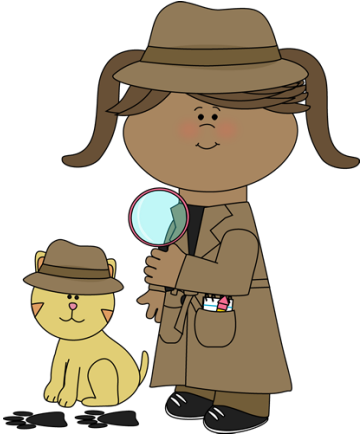

Players take turns flipping over two cards per turn. When it's your turn flip over two cards. If the two cards are the same, pick them up as a pair to keep a point. At the end of the game, see who has the most points.
